

2013 WOW Challenge Technical Papers

Banks, D. and Meroney, R.N. (2001), "A model of roof-top surface pressures produced by conical vortices: Model development", *J. of Wind and Structures*, **4**(3), 227-246.

Banks, D., Sarkar, P., Wu, F. and Meroney, R.N. (2001), "A Device to Mitigate Vortex Induced Rooftop Suction", *Proc. 1st Americas Conf. on Wind Eng.*, Clemson Univ., Clemson, USA.

Baskaran, A., Molleti, S. and Roodvoets, D. (2007), "Understanding low-sloped roofs under hurricane Charley from field to practice", *J. ASTM International* (online version), **4**, No.10.

Blessing, M.C. (2007), "Mitigation of Roof Uplift through Vortex Suppression Techniques", *Master's Thesis, Dept. of Civil Eng., Florida International Univ.*, Miami, USA.

Cochran, L.S. and Cermak, J.E. (1992), "Full- and model-scale cladding pressures on the TexasTech Experimental Building", *J. Wind Eng. Ind. Aerodyn.* **43**, 1589-1600.

Cochran, L.S., Cermak, J.E. and English, E.C. (1995), "Load Reduction by Modifying the Roof Corner Vortex", *Proc. 9th International Conf. on Wind Eng.*, New Delhi, India, 1091-1102.

Cochran, L.S., Levitan, M.L., Cermak, J.E. and Yeatts, B.B. (1993), "Geometric Similitude Applied to Model and Full-Scale Pressure Tap Sizes", *3rd Asia-Pacific Symp on Wind Eng.*, 917-922, HK.

Cochran, L.S. and English, E.C. (1997) "Reduction of Roof Wind Loads by Architectural Features", *Architectural Science Review*, **40**, 79-87.

Cook, N.J. (1990), "The designer's guide to wind loading of building structures, Part 2: Static Structures", Building Research Establishment, UK.

Factory Mutual Research Corporation (FM) (1985), "Factory Mutual Property Loss Prevention Data Sheet 1-49 – Perimeter Flashing", Factory Mutual, Norwood, MA, USA.

Federal Emergency Management Agency (FEMA) (2004), "Improving School Safety", *Risk Management Series design guides*, FEMA RMS #424, Jan. 2004, USA.

Federal Emergency Management Agency (FEMA) (2007), "Improving Critical Facility Safety", *Risk Management Series design guides*, FEMA RMS #543 Jan. 2007, USA.

Franchini, S., Pindado, S., Meseguer, J. and Sanz-Andrés, A. (2005), "A parametric, experimental analysis of conical vortices on curved roofs of low-rise buildings" *J. Wind Eng. Ind. Aerodyn.* **93**, 639-650.

Gerhardt, H.J. and Kramer, C. (1992), "Effects of building geometry on roof wind loading", *J. Wind Eng. Ind. Aerodyn.*, **43**, 1765-1773.

Institute for Business and Home Safety (IBHS) (1999[1]), "Performance of Metal Buildings in High Winds", *Natural Hazard Mitigation Insights (ISSN 1089-6058)*, No.9, January 1999, USA.

Institute for Business and Home Safety (IBHS) (1999[2]), "Metal Edge Flashing", *Natural Hazard Mitigation Insights (ISSN 1089-6058)*, No.10, June 1999, USA.

Institute for Business and Home Safety (IBHS) (2004), "Preliminary Damage Observation: Hurricanes Charley, Frances, Ivan and Jeanne", Tempa, USA

Kind, R.J. and Wardlaw, R.J. (1984), "Behaviour in Wind of Loose-Laid Roof Insulation Systems, Part I: Stone Scour and Blow-Off", *4th Canadian Workshop on Wind Eng.*, Toronto, Canada.

Kopp, G.A., Mans, C. and Surry, D. (2005), "Wind Effects of Parapets on Low Buildings: Part 4. Mitigation of Corner Loads with Alternative Geometry", *J. Wind Eng. Ind. Aerodyn.* **93**, 873-888.

Kramer, C. and Gerhardt, H.J. (1989), "Wind pressures on roofs of very low and very large industrial buildings", *Proc. 8th Colloq. on Industrial Aerodyn.* Part 2, Aachen, Germany.

Leatherman, S.P., Gan Chowdhury, A., Robertson, C. J. (2007), "Wall of Wind Full-Scale, Destructive Testing of Coastal Houses and Hurricane Damage Mitigation," *J. Coastal Res*, **23**, 1211-1217.

Lin, J.X. and Surry, D. (1993), "Suppressing extreme suction on low buildings by modifying the roof corner geometry", *Proc. 7th US National Conf. on Wind Eng.*, Univ. of Calif., USA, Session 3A.

Lin, J.X. and Surry, D. (1998), "The Variation of Peak Loads with Tributary Area near Corners on Flat Low Building Roofs", *J. Wind Eng. Ind. Aerodyn.* **77-78**, 185-196.

Lin, J.X., Surry, D. and Tieleman, H.W. (1995), "The distribution of pressure near roof corners of flat roof low buildings", *J. Wind Eng. Ind. Aerodyn.* **56**, 235-265.

Mehta, K.C. and Levitan, M.L. (1992), "Roof corner pressures measured in the field on a low building", *J. Wind Eng. Ind. Aerodyn.* **41**, 181-192.

Philips, M.K. (2003), "Evaluation of Mitigation Measures for Reducing High Suction Pressures on Roof Corners", *Master's Thesis, Dept. of Civil Eng., Clemson Univ.*, Clemson, USA.

Stathopoulos, T. (1987), "Wind pressures on flat roof edges and corners", *Proc. 7th Int. Conf. on Wind Eng.*, Aachen, Germany.

Surry, D. and Lin, J.X. (1995), "The Effect of Surroundings and Roof Corner Geometric Modifications on Roof Pressures on Low-Rise Buildings", *J. Wind Eng. Ind. Aerodyn.* **58**, 113-138.

Tieleman, H.W., Surry, D. and Lin, J.X. (1994), "Characteristics of mean and fluctuating pressure coefficients under corner (delta wing) vortices", *J. Wind Eng. Ind. Aerodyn.* **52**, 263-275.

Whalen, T.M.; Simiu, E.; Harris, G.; Lin, J.; Surry, D. (1998), "Use of Aerodynamic Databases for the Effective Estimation of Wind Effects in Main Wind-Force Resisting Systems: Application to Low Buildings", *J. Wind Eng. Ind. Aerodyn.* **77-78**, 685-693.

Wu, F. (2000), "Full-Scale Study of Conical Vortices and Their Effects near Roof Corners", *Doctoral Dissertation, Dept. of Civil Eng., Texas Tech Univ.*, Lubbock, USA.
